**Occupational Safety and Health Branch  
Labour Department**

**September 2022**

# **Occupational Safety and Health Statistics**

## **Introduction**

Statistics in this section provide information and analysis on work-related accidents and occupational diseases in Hong Kong. They also provide recent accident trends by economic sectors and selected industries. Employers, employees and occupational safety and health practitioners may use them to measure the performance in their own organisations against the overall accident rates and the industry average. We hope that such information will help individual establishments manage their occupational safety and health programmes better and improve their safety performance.

## **Definitions and further information**

**Occupational injuries** refer to injury cases in workplaces reported under the Employees' Compensation Ordinance, resulting in death or incapacity for work of over three days.

**Occupational injuries** include reported cases outside the jurisdiction of the Occupational Safety and Health Ordinance, e.g. cases of natural diseases and cases happened outside Hong Kong.

**Industrial accidents** refer to injuries and deaths arising from industrial activities in industrial undertakings as defined under the Factories and Industrial Undertakings Ordinance.

**Occupational diseases** refer to confirmed cases of occupational diseases and gas poisoning reported under the Occupational Safety and Health Ordinance, the Employees' Compensation Ordinance, the Occupational Deafness (Compensation) Ordinance and the Pneumoconiosis and Mesothelioma (Compensation) Ordinance.

Injury rate per 1 000 employees is calculated by:

$$\frac{\text{Number of occupational injuries}}{\text{*Employment size}} \times 1\,000$$

Accident rate per 1 000 workers is calculated by:

$$\frac{\text{Number of industrial accidents}}{\text{*Employment size}} \times 1\,000$$

\* Figures of employment size are based on the Quarterly Report of Employment and Vacancies Statistics published by the Census and Statistics Department.

**The components that form the statistics may vary from country to country in respect of the legal requirements in the reporting of accidents and occupational diseases, the economic sectors covered and the definition of workforce. Accident and occupational disease statistics of different countries may not be directly comparable and should therefore be interpreted with care.**

For enquiry or further information relating to the accident statistics, please contact  
the Accident Analysis and Information Division at  
Tel: 2815 0678 or Fax: 2541 8537.

For enquiry or further information relating to occupational disease statistics, please  
contact the Occupational Medicine Division (Health Promotion) at  
Tel: 2852 4041 or Fax: 2581 2049.

If you have any complaint about unsafe operations and environments at workplaces,  
please call the Labour Department's occupational safety and health (OSH) complaint  
hotline at 2542 2172 or fill out and submit an online OSH complaint form on our  
website.

All complaints will be treated in the strictest confidence.

Notes:

- The above statistics are compiled based on the Hong Kong Standard Industrial Classification (HSIC) Version 2.0.
- Figures of employment size for calculating the accident rate per 1 000 workers are based on the **Quarterly Report of Employment and Vacancies Statistics** published by the Census and Statistics Department (C&SD). Since 2009, the Quarterly Survey of Employment and Vacancies conducted by the C&SD has been enhanced to adopt the HSIC Version 2.0 to replace the HSIC Version 1.1 in compiling the statistics on the number of establishments, persons engaged and vacancies. Hence, the employment size from 2009 onwards are in HSIC Version 2.0.
- The statistics from 2009 onwards cannot be compared with those of previous years due to the changes in coverage of individual industries (except Construction Industry) in HSIC Version 2.0.
