

Work Safety Alert

Fall from Metal Canopy

- 1. Date of Accident :** May 2025
- 2. Place of Accident :** A residential house
- 3. Summary :**

A worker fell about 2.8m while working on the top of a metal canopy being installed at a residential house. He was certified dead in hospital later on the same day.

4. Work Safety Alert for Contractors/ Employers :

To prevent any workers from falling from height while at work, contractors/ employers should provide and maintain the following precautionary measures:

- providing and ensuring the proper use of suitable working platforms for work that cannot be safely done on or from the ground or from part of a permanent structure;
- ensuring that every working platform is protected with (i) suitable guard-rails, with the height of intermediate guard-rail between 450mm to 600mm, and the height of the top guard-rail between 900mm to 1150mm; and (ii) suitable toe-boards or other similar barriers with a height of not less than 200mm;
- ensuring that every working platform is closely boarded or planked; and every board or plank rests securely and evenly on its supports;
- ensuring that all nearby dangerous edges are properly fenced off;
- where the provision of suitable working platforms or protection of

dangerous edges is not reasonably practicable, setting up a fall arresting system (or an alike system) by providing every worker concerned with a suitable safety harness and ensuring the continuous plus proper attachment of the harness to a suitable anchorage system while at work;

- providing and maintaining suitable and adequate safe means of access to and egress from every place of work;
- providing workers involved with a suitable safety helmet equipped with a chin strap and ensuring that they properly wear it on construction sites;
- setting up and implementing a safe system of work with an effective monitoring and control system for the canopy installation work with due regard to work at height safety; and
- providing all workers involved with necessary safety information, instruction and training, and ensuring that they are familiar with the safe work procedures and relevant safety measures.
