4. Use of personal protective equipment

- Ensure the person entering a confined space or remaining therein has worn an approved breathing apparatus of a type that gives appropriate protection given the nature of the confined space.
- For underground pipework or where the risk assessment report recommends the use of approved breathing apparatus.
- Ensure the person is also wearing a safety harness connected to a line to the free end of which is held by a person outside who is capable of pulling him out of the confined space.

Breathing apparatus used in confined space work shall be of a type approved by the Commissioner for Labour. Notice of approval of these apparatus will be published in the Gazette.

5. Emergency procedures

- Formulate and implement emergency procedures to deal with any serious and imminent danger to workers inside confined space.
- Provide and keep readily available in satisfactory condition sufficient supply of —
  - Approved breathing apparatus.
  - Reusing apparatus.
  - Vessels containing oxygen or air.
  - Safety harnesses and ropes.
  - Audio and visual alarm for alerting others outside confined space.

- Ensure sufficient number of persons who know how to use the safety equipment are present when work is taking place in confined space.

6. Provision of information, instructions, etc.

- Provide all workers working within a confined space and those outside assisting in such work with instructions, training and advice as are necessary to ensure safety and health of workers.
- Provide all equipment necessary to ensure safety and health of workers.

Your duties as a certified worker

- Observe emergency procedures implemented by the proprietor or contractor.
- Observe instructions and advice and attend training provided by the proprietor or contractor.
- Make full and proper use of, and forthwith report to the proprietor or contractor any fault or defect in, any safety equipment or emergency facilities.

Your duties as a competent person

When requested to do so by a proprietor or contractor —

- Carry out an assessment of the working conditions of a confined space covering all the aspects specified under the Regulation.
- Make recommendations on measures in relation to safety and health of workers while working in that space.
- Submit the assessment report with recommendations to the proprietor or contractor within a reasonable period of time.

Penalty

- A proprietor or contractor who fails in his duties under the Regulation commits an offence and is liable on conviction to a maximum fine of $200,000 and 12 months' imprisonment.
- A certified worker who fails in his duties under the Regulation while working in confined space, wilfully and without reasonable cause does anything likely to endanger himself or others commits an offence and is liable on conviction to a maximum fine of $50,000 and 6 months' imprisonment.
- A competent person who fails in his duties under the Regulation or makes a risk assessment report which is to his knowledge false as to a material particular commits an offence and is liable on conviction to a maximum fine of $200,000 and 12 months' imprisonment.

Enquiry & Complaints

This guide explains provisions of the Regulation in simple terms. In case of any inconsistency with provisions of the Regulation explained, the Regulation itself shall prevail. For any enquiry about this guide, you can contact us at:

- Telephone: 2536 2097
- Fax: 2915 1410
- E-mail: enquiry@labour.gov.hk

If you have any complaint about unsafe workplaces and practices, please call the Labour Department’s occupational safety and health complaint hotline on 2542 2772. All complaints will be treated in the strictest confidence.

Published by the Labour Department 5/2009-2a L50
1. Risk assessment and recommendations

- Appoint a competent person to carry out risk assessment for work in a confined space and make recommendations on safety and health measures before undertaking the work.
- Appoint a competent person to carry out fresh assessment and make recommendations whenever there has been a significant change in the conditions of the confined space or of the work activities or whenever there is reason to suspect that such change likely to affect the safety and health of workers working therein may occur.

2. Compliance with risk assessment report and certification

- Verify the risk assessment report submitted by the competent person.
- Issue a certificate stating that all necessary safety precautions in relation to the hazards identified in the risk assessment report have been taken and the period during which workers may remain safely in the confined space before allowing workers enter the confined space for the first time.
- Ensure no worker enters or remains in a confined space unless all recommendations in the risk assessment report have been complied with.
- Keep the certificate and risk assessment report for one year after work in the confined space has been completed and make them available to an occupational safety officer when requested.

Risk Assessment Report is a written report which contains the assessment and recommendations carried out by a competent person for the work in a confined space. It identifies the hazards likely to be present in the confined space, evaluates the extent of the risks arising from such hazards and, without limiting the foregoing, covers the following:

- The work method to be used and the plant and materials to be used in work activities;
- Whether or not there is any hazardous gas, vapour, dust or fume present or there is any deficiency in oxygen;
- The possibility of —
  - Ingress of hazardous gas, vapour, dust or fume;
  - Sludge or other deposits being present that are liable to give off hazardous gases, vapour, dust or fume;
  - Inrush of free flowing solid or liquid;
  - A fire or explosion in the confined spaces;
  - Loss of consciousness of worker arising from an increase in body temperature;
- Recommendations on the safety measures required, including whether or not the use of approved breathing apparatus is necessary;
- The period during which workers may remain safely in the confined space;
- Recommendation on use of such monitoring equipment if there is a substantial likelihood of a change in the environment leading to an increased risk from the aforementioned possible hazards in the course of work.

3. Safety precautions

Before allowing workers enter a confined space for the first time:

- Disconnect and lock out power source to mechanical equipment which is liable to cause danger inside the confined space.
- Blank off pipe or supply line whose contents are liable to create a hazard.
- Test to ensure absence of any hazardous gas and no deficiency of oxygen in the confined space.
- Purge, cool and ventilate the confined space to ensure it is a safe workplace.
- Provide adequate respirable air and effective forced ventilation in the confined space.
- Prevent ingress of hazardous gas, vapour, dust, fume and Inrush of free flowing solid or liquid into the confined space.

When work is being carried out in a confined space:

- Ensure only certified workers enter or work in the confined space.
- Ensure a person is stationed outside the confined space to maintain communication with the workers inside.
- Ensure the risk assessment report and related certificate are displayed in a conspicuous place at the entrance of the confined space.
- Ensure the safety precautions undertaken continue to be effective.

**Certified worker** means a person —

- a. who has attained the age of 18 years; and
- b. who holds a certificate issued by a person whom the Commissioner for Labour has authorized to certify workers as being competent to work in a confined space.
